This is Scraptradeasia

Scraptradeasia is Tradeasia's International circular economy marketplace platform. Our platform provides various recycled raw materials and industrial scrap across the world, ranging from ferrous metal, non-ferrous metal, paper, plastic, and rubber.

Our Vision

To be the global leader in the trading of recycling materials who believes in sustainability.

Our Mission

We strive to be a reliable and trustworthy partner in the global supply chain of scrap materials, creating a secured and seamless recycling trade, to provide an eligible marketplace and deliver top-quality scrap products and services through effective supply chain solutions. Meanwhile, we also want to provide profitable and sustainable growth to all our stakeholders.

Our Value

We valued trust, integrity, commitment, sustainability, entrepreneurship, and partnership through an effective solution-oriented management system.

Our Intention

As part of our commitment to protect the environment, we are determined to encourage companies to implement sustainable raw material sourcing by distributing reusable and recyclable scraps that will benefit both the environment and companies. We relocate the byproducts of a process to the beginning of another process, which could effectively increase sustainability and effectiveness of the whole supply chain process. Consequently, our distribution process involves less ecological footprint needed to execute the whole process.

Furthermore, recycling scraps will require fewer stages to turn them into usable materials, compared to producing a new one. It will also be impactful in conserving natural resources, protecting the ecosystem, and reducing the negative impact on climate change.

Together, we can build sustainable earth for the future to come.
